Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: It was argued that the rejections under 35 USC 112 first paragraph should be withdrawn because the use of the fragments was to generate antibodies that would specifically recognize flt4 protein. it was also discussed that the fragments would be defined structurally because they are generated by cyanogen bromide cleavage, and also need to generate antibodies specific for flt4. Also discussed the age of the reference used as the basis for the rejection under 35 USC 102(b)..
